Theoretical courses

Refresher on cardiovascular biology and cardiovascular pathologies
Lecturer: Prof. Vincent Segers, University of Antwerp

Learning outcome: Understand the physiology and pathophysiology of hypertension | Understand the pathophysiology of ischemic heart disease (including atherosclerosis) | Understand the pathophysiology of heart failure and cardiac remodeling.

Introduction to drug development and safety pharmacology (SP)
Lecturer: Dr. Jean-Pierre Valentin, UCB Biopharma SRL

Learning outcome: Understand the process of drug development and the importance of clinical safety | Introduction to non-clinical safety testing | Principles and helicopter view on Safety Pharmacology and Toxicology.

Regulatory requirements in drug development and SP
Lecturer: Xi Yang, The US Food and Drug Administration (FDA)

Learning outcome: Requirements for nonclinical studies and their relation to the conduct of human clinical trials | Regulatory requirements for cardiovascular evaluation of drug candidates | Advantages and limitations of the methods currently used for cardiovascular safety assessment.

3Rs in basic research and drug R&D
Lecturer: Dr. Helen Prior, The National Centre for the Replacement, Refinement & Reduction of Animals in Research (NC3Rs)

Learning outcome: Position and regulations of animals experiments in basic research and drug R&D | Introduction to the 3Rs, i.e. Reduction Replacement and Refinement | Examples of implementations of 3Rs in safety pharmacology and toxicology | Which of the 3R’s are applicable within your own research and/or how your work will influence animal use by others in the future.

Clinical cardiology and cardio-oncology
Lecturer: Dr. Constantijn Franssen, Antwerp University Hospital

Learning outcome: Introduction to cardiology | Understand the main cardiovascular pathologies and methods used for diagnosis and treatment | Introduction to cardio-oncology | Understand challenges and best practices in cardio-oncology.
Workshop on transferable skills

Interactive Session on Impact
Lecturers: Prof. Pieter-Jan Guns, Paz Yanez and Dr. Bruno Hoste, University of Antwerp
Learning outcome: What is the impact of my research? Why is impact of research important? How can I increase the impact of my research? Tips and tricks for increasing the impact of your research.

Career Development Plan
Lecturers: Dr. Gábor Kismihók, Marie Curie Alumni Association, Prof. Pieter-Jan Guns, University of Antwerp | Testimonial speech by Dr. Muhammet Tanc, University of Antwerp
Learning outcome: How to develop a career development plan | Understanding which skills are required for becoming a successful researcher | What to do when reality is not

"Presenting with Impact"
Lecturers: Hans Van de Water, The Floor is Yours
Learning outcome: the participants learn to present their research or project in a clear and convincing manner, tailored to the needs of the target group.

Introduction to scientific writing
Lecturers: Prof. Pieter-Jan Guns, University of Antwerp
Learning outcome: An introduction to the process of academic publishing. How can we measure the quality of scientific output? What are the ingredients of a good scientific publication? Tips and tricks for writing your first publication.

Assignments, ECTS and course material
The successful completion of the summer school includes the submission of five assignments with due dates after the summer school. Only participants that have attended all the online sessions – social activities excluded – and delivered all the assignments in time are entitled to be awarded 3 ECTS credits. In brief, participants shall submit the following tasks (more details will be provided on-the-spot):

1. Self-biography incl. project summary embodied in 1-min ‘selfie-movie’ or picture with a 10-lines story
2. Outreach material consisting of a social media post and an infographic (group work)
3. Personal Career Development Plan (PCDP)
4. Research project presentation in 3 slides
5. Scientific writing

Course material will be made available on VICE Blackboard, link provided upon registration.
